Current RCRA CA Activities

RCRA Corrective Action (CA) activities at the Federal-Mogul Corporation facility are being conducted under the direction of the Virginia Department of Environmental Quality (DEQ). The CA investigations and any necessary clean up activities are being implemented in accordance with the conditions and requirements of the Hazardous Waste Management Post-Closure Permit (Permit).

The Virginia Department of Environmental Quality (DEQ) issued a renewal of the facility's Hazardous Waste Management Post-Closure Permit on August 20, 2006. The permit includes corrective action (CA) requirements applicable to site the former impoundment, which was closed as a hazardous waste landfill, and facility (site-wide) CA requirements.

Site Description

Federal-Mogul Corporation (Federal-Mogul) consists of an approximately 400,000 square-foot break-lining manufacturing facility consisting of a building and several smaller structures on a 40-acre site, located in Winchester, Virginia. The plant is bounded by CSX Railroad property on the west and Pleasant Valley Road on the east.

The facility was constructed in 1947 on farmland. Abex Corporation owned and operated the facility from 1947 until 1988. Pneumo-Abex Corporation owned and operated the facility from 1988 until 1994. Wagner Electric Corporation purchased the facility in November 1994, and occupied the facility until October 1998, when Federal-Mogul Cooperation purchased Cooper Automotive which included Wagner Electric.

Break pads and break components have been manufactured at the facility since 1947. Until 1988, lead and asbestos was used in the manufacturing process. Hazardous waste from the process was managed in surface impoundments and a waste pile, which were closed in the 1980's pursuant to RCRA requirements and which are subject to the post-closure care requirements set forth in the current RCRA Post-Closure Permit. The closed RCRA surface impoundments and waste pile were closed as landfills and are located on the northern portion of the Federal-Mogul property with an active non-hazardous landfill. Vegetation covers the ground surface and a fence encloses the RCRA units.

RCRA CA Milestones

To date, the following Resource Conservation and Recovery Act (RCRA) Corrective Action (CA) milestones have been completed at this facility:

- On October 29, 1985 facility filed a hazardous waste permit application.
- On September 27, 1995, the original Hazardous Waste Management Post-Closure Permit became effective until September 27, 2005.
- In 1995 a Phase II was prepared for Cooper Industries on behalf of Wagner Electric to establish environmental conditions at the site following Wagner Electric's purchase of the site from Pneumo Abex Corporation in November 1994.
- In September 2006 an Interim Measures Work Plan: AOC-1 was submitted to address the presence of trichloroethylene (TCE) in groundwater in the localized area around Apex monitoring well MW-4, adjacent to the paved area near the southeast corner of the manufacturing facility. This Work Plan also indicated the presence of another area of concern, AOC-2, buried black fibrous waste material containing lead and asbestos, in locations in the vicinity of, but outside of, the closed RCRA landfill units at the facility.
- On November 2, 2006 the Interim Measures Work Plan: AOC-1 was approved to address the presence of trichloroethylene (TCE) in groundwater.

- On November 28, 2006 a RCRA Facility Investigation Phase I Plan was submitted to address areas of concern AOC-1 and AOC-2.
- On January 4, 2007 a Notice of Deficiency was issued for the RCRA Facility Investigation Phase I Plan.

Details and supporting documentation can be obtained by reviewing the files at DEQ's Central Office or by contacting the project managers identified in this factsheet.

Environmental Indicator Status

Under the Government Performance and Results Act (GPRA), the Environmental Protection Agency (EPA) set national goals to address high priority RCRA CA facilities by the year 2008. EPA evaluates two key indicators for each facility: *Current Human Exposures Under Control* and *Migration of Contaminated Groundwater Under Control*. This facility is one of EPA Region 3's high priority facilities and falls under the GPRA initiative.

The current Environmental Indicator Status for this facility is:

- *Human Exposures Controlled Determination:* **YE:** Current human exposures under control.
- *Release to Groundwater Controlled Determination:* **YE:** Migration of contaminated groundwater under control.

Contaminants

The primary constituent of concern is TCE in groundwater at AOC-1. Additional constituents of concern include lead and asbestos in the soil at AOC-2.

Institutional Controls

The Virginia Department of Environmental Quality (DEQ) issued a renewal of the facility's Hazardous Waste Management Post-Closure Permit on August 20, 2006. The permit includes facility post-closure and corrective action (CA) requirements applicable to the former impoundment, which was closed as a hazardous waste landfill and includes site-wide CA requirements. Post-closure groundwater monitoring is required at the site for the regulated units. Vegetation covers the ground surface and a fence encloses the RCRA units. Federal-Mogul does not anticipate the need to treat off-site groundwater.

A Deed Notice is in place identifying the location of the former impoundment closed with waste in place as a hazardous waste landfill.

Community Involvement

A copy of all documents relating to the RCRA CA program at this facility are available for viewing at DEQ's Central Office located at 629 East Main Street in Richmond, Virginia. Additionally, public review can be conducted at:

Handley Regional Library
100 W. Piccadilly Street
Winchester, VA 22601
Phone: (540) 662-9041

The documents may be reviewed during normal library hours, Monday-Wednesday: 10:00 AM – 8:00 PM; Thursday-Saturday: 10:00 AM – 5:00 PM; and Sundays in October, November, and January through April: 1:00 PM – 5:00 PM. For more information about the library's operations, please visit the library's website at: <http://www.hrl.lib.va.us> or contact by email at hhref@hrl.lib.state.va.us

Government Contacts

The Commonwealth of Virginia has the lead authority for this project. Please contact the DEQ project manager listed below for details on this project or the contents of this factsheet.

DEQ Project Manager

Christopher R. Tompkins, Jr., P.E.
Environmental Engineer Senior
Virginia Department of Environmental Quality
P.O. Box 1105
Richmond, VA 23240
Phone: (804) 698-4124
Email: crtompkins@deq.virginia.gov

EPA Project Manager

Mr. Mike Jacobi – 3WC23
USEPA - Region 3
1650 Arch Street
Philadelphia, PA 19103-2029
Phone: (215) 814-3435
Email: jacobi.mike@epa.gov

For more information about EPA's CA program, including Environmental Indicators, please visit EPA's website at: www.epa.gov/reg3wcmd/correctiveaction.htm

Facility Contact

The facility contact, as listed in the RCRA Permit, is:

Mr. Howard Schmitt
Plant Manager
Federal-Mogul Corporation
2410 Papermill Road
Winchester, VA 22601
Phone: (540) 662-3831
Email: howard_schmidt@fmo.com

Fact Sheet Update

The previous fact sheet was updated January 2007. The next fact sheet update is scheduled for January 1, 2008. Previous fact sheets may be obtained through the above DEQ contact.
